DETAILED ACTION

The claims are unpatentable for the same reasons set forth in the rejection of claim mailed on 03-25-05.

Response to Arguments

Applicant's arguments filed 09-29-05 have been fully considered but they are not persuasive. Applicants remarks advance that Uk 436' fails to teach the cooking device of claim 13 which displays the different operating modes of the cooking device and the on and on off modes of the chamber. Applicant argues that 436' automatically determines the cooking mode. This is correct. However, the claim limitations do not preclude this type of system. Claim 13 defines a display panel with an optical display which can display the different cooking modes of the cooking chamber and on of off mode of the chamber. So even though the cooking modes are chosen automatically by the Uk 436'system, they are also displayed as they occur, to the user. In fact, all that is set forth in claim 13 is a basic display found in most programmable microwave ovens sold today. Note that page 5 in Uk 436 defines that a mode such as fan heat will be displayed to the user, "corresponding to that particular mode of cooking". How can Applicant argue that Uk does not display cooking modes when line 13 of page 5 in Uk specifically states that cooking modes is displayed?

Clearly, in view of this, Applicant can no longer argue that the Uk 436 reference does not display cooking modes.

Note that the display in Uk 436' is a luminous display as claimed.

Applicant should also be aware that the automatic operative mode in Uk 436' is just an option. Manual choice and display of the cooking modes and the cooking mode parameters can be effected by the user of the device. As per new claim 24, Uk 436' does teach display of the cooking mode, display of the cooking chamber temperature (residual heat in the chamber) and display of the on mode of the chamber(the current operating mode of the device.). For these reasons the prior art of record , as applied renders the claimed subject matter as unpatentable.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
